

[ACIDIC REDUCER FOR PROVIDING INCREASED ADHESION OF A TWO COMPONENT POLYURETHANE PRIMER TO SUBSTRATES]

Abstract of Disclosure

A composition comprising a two component polyurethane composition comprising a first component comprising a polyisocyanate and a second component comprising a polyol, wherein at least one of the first component and the second component further comprise a solvent; a phosphoric acid; and a phosphate ester of the formula $(OM)_{3-n}P(O)(OR)_n$, wherein n is 1 or 2, R is an organofunctional group, and M is hydrogen, metal, or ammonium. Also, a composition comprising a two component polyurethane composition comprising a first component comprising a polyisocyanate and a second component comprising a polyol, wherein at least one of the first component and the second component further comprise a solvent, a phosphoric acid, and an epoxy resin. Also, methods of making the compositions
